Common Loss Control Services in Healthcare

1. Assist with OSHA regulatory compliance:
   a. Review training compliance, including training materials and provide training as needed.
   b. Review compliance of written materials and provide examples or templates as needed.
   c. Develop company-wide templates on specific standard requirements (i.e., PPE Hazard Assessment, BBP list jobs with occupational exposure).
   d. Provide mock OSHA inspections with written recommendations.

2. Provide an overall safety and health program evaluation, including timeline recommendations and a plan of action. This also includes auditing specialized programs, such as patient/resident lift programs.

3. Provide training in various topics including (but not limited to):
   a. Regulatory compliance
   b. Ergonomics/lift training
   c. Using lift equipment
   d. Accident investigation
   e. Prevention infectious disease
   f. CPI (Crisis Prevention Institute) and defensive driving.
   g. Conduct evacuation drills

4. Provide loss information and injury/illness trend information with focus on root cause analysis.

5. Provide recommendations for safety goals and safety promotional activities.

6. Attend safety committee meetings.

7. Provide facility safety walk-throughs to identify potential risks.

8. Provide ergonomics assessments/recommendations, including light studies and one-on-one office adjustments.

9. Assist claims with RTW issues (i.e. jobs with restrictions, etc.).

10. Meet with facility HCP’s to discuss enhancing the RTW procedure, and post-offer physical criteria.

11. Develop written job descriptions with emphasis on physical demands.

13. Assist with follow-up to OSHA notifications/citations.

14. Research information on various subjects including drug testing, and safety shoes.

15. Provide suggested policies for various safety topics, and equipment.
