New OSHA Steel Erection Standard

OSHA’s new steel erection standard becomes effective January 17, 2001. The standard is designed to protect all workers engaged in steel erection with the exception of certain tower construction. The standard addresses the major causes, injuries, and fatalities on the jobsite.

The new standard includes a section on:

- Site Layout and Construction Sequence
- Site Specific Erection Plan
- Hoisting and Rigging
- Structural Steel Assembly
- Column Anchorage
- Beams and Columns
- Open Web Steel Joists
- Systems-Engineered Metal Buildings
- Falling Object Protection
- Fall Protection
- Training
