

TOWNSHIP OFFICIALS OF ILLINOIS RISK MANAGEMENT ASSOCIATION

## RISK REMINDER

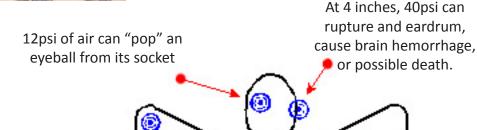

PARTNERING WITH TOWNSHIPS

## **Compressed Air Hazards**

If used for cleaning purposes, must be maintained less than 30 psi: 29 CFR 1910.242(b)

## **NEVER**Look into the "business" end

Point it toward any part of the body; Yours or others

Less than 80psi of air, striking a small wound on the hand has been known to inflate the arm "to the size of a grapefruit" due to air bubbles in the bloodstream

Air can enter the navel through a layer of clothing, inflating and rupturing the intestines

## Other Facts:

- A hurricane wind can drive a straw endwise into a tree or wooden telephone pole
- A 70-mile-per-hour wind exerts a pressure of only one-tenth of a pound per square inch (0.1psi)
- A wind of 120-miles-per-hour has a pressure of only 0.25psi
