Effective Workplace Safety and Health Management Systems

Every day, workplace injuries, illnesses and fatalities cause immeasurable pain and suffering to employees and their families. Recent estimates indicate that workplace injuries and illnesses cost our nation's businesses \$170 billion per year in wasteful and often preventable expenses.

The best Safety and Health Programs involve every level of your organization, instilling a safety culture that reduces accidents for workers and improves the bottom line for managers. When Safety and Health are part of your organization and a way of life, everyone wins.

Does a Safety and Health Program really make a difference?

Definitely!!

Below are four crucial questions you should be asking:
