RISK REMINDER

Three-Point Contact

Mounting and dismounting equipment causes many injuries each year. Some injuries are as serious as broken ankles or knees.

Three-Point Contact (the Safety Triangle) provides safety for mounting and dismounting equipment, even with hazardous conditions such as mud, snow, or ice.

When you get on or leave the machine, always:

- Maintain a three point contact with the steps and hand holds.
- Face the machine when either mounting or dismounting.
- Never jump on or off the machine. Never attempt to mount or dismount a moving machine.
- Do not use the steering wheel or any control lever as a hand hold when you enter or leave the machine.

3 Point Contact THE SAFE WAY!
